🚗 Permis B

Free software enthusiast and self-hosting mad scientist. Excited about building and maintaining secure, scalable and robust systems.

📁 Work experience

DevOps / Site Reliability Engineer, Veesion

Jan 2026 – Present | Full-Remote, France

Designing and operating Kubernetes clusters running AI microservices for real-time gesture detection in retail environments. Responsible for infrastructure as code (Terraform, Ansible), container orchestration (Helm, Helmfile), CI/CD automation (GitHub Actions), and AWS services management. Supporting a platform that processes video feeds across 5,000+ stores in 25+ countries.

DevOps Engineer, Ziostring

Oct 2023 – Feb 2025 | Full-Remote

Built and maintained internal infrastructure tooling (Python, Symfony, Bash, Helmfile) for a sovereign multi-cloud hosting platform. Deployed and managed Kubernetes clusters across AWS, Scaleway, Hetzner, and OVH using Ansible and Helm. Designed CI/CD pipelines with Tekton and GitLab CI. Contributed to a 100% open-source, vendor-agnostic platform providing managed Kubernetes and database services to European clients.

DevSecOps Engineer, Orange

Sep 2022 – Sep 2023 | Sophia Antipolis, France

Combined security and operations responsibilities at one of Europe's largest telecommunications providers. Performed white-box penetration testing and source code analysis on internal services. Deployed Fortify SAST with Helm and integrated security tooling into GitLab CI/CD pipelines. Managed container workloads on Kubernetes.

Research Apprentice, INRIA

Sep 2021 – Aug 2022 | Sophia Antipolis, France

Built infrastructure tooling for France's national research institute for digital science. Developed a Rust-based Docker orchestrator to streamline researchers' workflows. Created VM images for the R2Lab wireless testbed, enabling reproducible networking experiments. Prioritized code quality, performance, and maintainability.

Network & Virtualization Engineer, Citrix Systems Inc.

Jan 2019 – Jul 2020 | Dublin, Ireland

Delivered enterprise support for Citrix's virtualization and networking products (NetScaler, XenDesktop, XenApp) across multi-platform environments. Diagnosed network issues using Wireshark packet analysis and automated diagnostics with Bash scripting. Focused on rapid resolution times and clear client communication, in French and English.

🎓 Education

Master of Science - Computer Science, Université Côte d'Azur

2021 – 2023

Sophia Antipolis, France

Passed with honours (Mention Bien). First year focused on software engineering fundamentals, Linux system administration, and database technologies (MongoDB, Spring Framework). Second year specialized in cybersecurity: vulnerability assessment, intrusion detection (Snort), web application penetration testing (Burp Suite), and security architecture.

Bachelor of Science - Computing in Digital Forensics and Security,

Technological University Dublin

2019 – 2020 | Dublin, Ireland

Covered digital forensics, secure programming, cryptography, data recovery, and web application security. Gained hands-on experience with forensic investigation methodologies, incident response, malware analysis, and security auditing. Developed YAVS, an automated server auditing solution.

DUT Informatique,

Université de La Rochelle

2016 – 2018 | La Rochelle, France

Intensive technical degree covering software development (C, C++, Java), web development (Angular, Symfony), computer networking, Linux systems, and project management fundamentals.

🏆 Certificates

HashiCorp Terraform Associate

AWS Certified Cloud Practitioner
